

September 1st, 2026

Dear valued customer,

Notice of Price Revision

Due to recent sharp increase in cost such as electronic components, plastic parts, logistics, energy and so on, manufacturing cost has been increasing. We had been making our own effort in order to absorb these rising costs internally, however current economic climate does not allow us to maintain the same quality of products without price revision.

Regrettably, please be advised that new pricing for both machines and parts will apply to all purchase orders received on or after October 1st, 2026.

We remain committed to delivering the highest quality products and services, and we deeply appreciate your understanding and continued support.

1. Price Revision:

Product	Price Revision Rate
Machines (tabletop model)	Max. +20%
Machines (industrial model)	Max. +20%
Parts	Max. +30%

2. Date of Revision: Purchase order received on and after October 1st, 2026

For further information and inquiries, please contact person in charge of your account.

Kind regards,

Global Business Department
