## **Suzumo International's U.S. East office Announces Warehouse Opening to Accommodate Growth**

NEW JERSEY, Jan. 25, 2021 (U.S. East Office) – Suzumo International Corporation's U.S. East office, since opening in 2016 in Englewood Cliffs, New Jersey, has been operating as the U.S. Eastern territory sales and service division office, as the wholly owned subsidiary of Suzumo Machinery Co, Ltd. of Tokyo, Japan. On Jan. 25, 2021, all operations and employees will move to a larger office and warehouse facility in Teterboro, New Jersey, that is conveniently located next to all major highways for easy travel to New York and other surrounding states. The East office will be moving from its current office address at 560 Sylvan Avenue, Suite 2020, Englewood Cliffs, NJ 07632 to our new facility located at 375 North Street, Unit K, Teterboro, NJ 07608.

The new office and warehouse space is approximately 3,000 square feet, which makes it nearly two times larger than the previous office, and will allow us to engage in warehouse and shipping services. The new facility will provide our U.S. East customers with faster quality service and reduced shipping cost-saving advantages. The added services will allow the East office to generate more sales and service income.

“We are excited to relocate to our new, larger office and warehouse in Teterboro, New Jersey,” comments James Kim, Branch manager of the East office. “This move represents another significant milestone for our fast-growing food technology company and growth in the U.S. market. The new facility better accommodates our growing team and enables us to hire additional talent to continue to provide industry-leading sales and support. The additional space will also help provide better customer service and technical support, while providing the opportunity for further expansion into additional markets, product lines and services.”

The new space reflects the growing brand, success, and culture of SUZUMO in the U.S. market and strives to make it a great place for future team members to work and generate more success in our markets. The facility will feature a technology-enabled showroom with virtual training and demonstration ability, improved inventory and shipping management, that will help launch our office and Suzumo International into the new decade.
